

QUANTA or UNIVERSAL LAW

Quanta or universal or cosmic laws and principles explain how quantum particles operate and how to remain compassionate all of the time.

Quantum law of **CONSCIOUSNESS** is the laws of quantum particles. Human consciousness is in a quantum state and is a stream of consciousness spanning many dimensions, realities and resonances. The resonance of the thoughts the soul holds, reflect the resonance the soul exists in.

Higher brainwave states of consciousness and their resonances are found in your imagination and sensory perceptions, while dreaming or meditating or enjoying yourself. They are translucent or filmy creations made by quanta from your thoughts. Communicating telepathically with other soul essences and the invisible realm.

You exist in your Astral Body, Light Body or Quanta Consciousness. Human biology is an earth ship, the same way the majority of Spacecraft are, large sentient computers responding to the soul's state of consciousness. Portals, corridors, vortexes, voids and wormholes are all STREAMS of consciousness moving into another state of consciousness or inter-dimension.

Quantum law of **AWARENESS** is that YOU need to consciously choose the reality you want to exist in, the quantum field of compassionate thought or the limited, quarantined reality of freewill found only in the third and lower fourth dimension.

Science, physics and spirituality are one and the same. The FREEWILL or FREEDOM you have is to think what you want to think. BUT you are also forced to ***own the resonance that your thoughts carry.***

Quantum principle of **SILENCE** is being aware and fully present. Observe know and allow with silence and nonresistance.

Quantum law of **ALLOWING** is you stop trying to get others to adopt your reality, beliefs, and resonance or carry your pain and suffering. Allowing grants each individual the right to have their own reality and resonance and to BE and DO whatever they choose. Violating the rights and choices of others or destroying any part of the collective environment, drops you out of compassion and into a lower resonance.

Law of allowing in the light quantum field ONLY has high consciousness; all thoughts are compassionate and allow.

Law of allowing in the dark bandwidth, you try to avoid interacting with Dark Ones, especially dark family members. When Dark Ones cross boundaries or borders you and others have, stand in your truth and keep your electromagnetic field closed to them. Be firm, use nonviolence and expose lies and distortions. YOU CANNOT FIX Dark Ones or their agendas, they need to do that for themselves, just like you need to do it for yourself.

Patience is putting the law of allowing into practice. Allowing things, people and events to unfold in their own manner. Patience is needed because humans are not generally aware of, or choose NOT to consider or care about, all

the other factors in play. IMPATIENCE is only found in the dark bandwidth and is a form of force that creates anger, which in turn creates fear and doubt.

Most all the changes happening on earth now are PROCESSES that take years or decades to complete. PATIENCE is the capacity to accept or tolerate delay or suffering until it gets better. IDEALLY patience arises naturally when your choice, is to enjoy YOU and what you are doing. Change your point of perception to enjoy your daily chores OR change what you do.

QUANTA, UNIVERSAL or COSMIC LAWS or TRUTHS are NEUTRAL statements explaining how and why quanta work as they do in the universe or quantum field. In the quantum field all are equal, there is no SURRENDERING or submitting to any authority other than your own ability to decide, create and un-create within the quanta energy flow of compassion and equality.

Anything less than giving and receiving compassion drops your individual consciousness and resonance, into the very limited thoughts and quarantined thinking found in the dark bandwidth of unconsciousness and negative thought patterns.

Our soul essence is our conscious awareness, and acceptance of what is true. Owning what your thoughts create for you, gives you the choice to move into compassion and a higher resonance to release tension and stress. You can literally release your pockets of density, through the skin, a runny nose or eyes, or out the digestive tract. Since we are all wired a bit differently, each one experiences release in their own way, at their own pace.

Your consciousness thinks and decides continuously.

Quantum principle of **THOUGHT** is that quantum particles organize themselves around your thought to create it. Seek or wonder about something and it gets manifested. The thoughts you hold are YOUR point of perception and the reality you continuously create.

Stop giving a thought your attention and it dissipates.

Each THOUGHT, "a consciousness has," becomes an individual entity or image with color, shape, smell and vibration, animated with your personal moral character, resonance and signature frequency.

Quantum principle of **RELATIVITY** is that what you view and understand from YOUR particular, personal viewpoint is true for you. That point of perception is RELATIVE and accurate to the viewer's point of perception.

If you think you are "dumb and slow" that is your RELATIVE truth.

Your thoughts create YOUR NOW for you alone.

If you think "THEM" is NOT a part of "US" and they need to die that is your relative truth. Your thoughts have created YOUR NOW for you alone, because that is not a quantum law or compassionate.

THE QUANTUM FIELD and quanta JUST ARE. There is no time or space or place or unknowns or secrets. Quanta is plural and quantum is singular, the Latin word for amount meaning the smallest possible discrete unit, of any physical property, such as energy or matter. Quantum or particle physics deals with the properties, relationships, and interactions of subatomic particles or

quanta, not visible to the naked eye. At the quantum level, matter and energy behave VERY differently from Newtonian mechanics and physicality. The scientific laws and principles of quanta also describe human consciousness.

Quantum behavior is the organizing principle of the light universe or light bandwidth. It's SENTIENT and NEUTRAL, having NO agenda, attachments, and judgment, blame or punishment.

BECAUSE when you remain in the light - you remain compassionate. You are always kind to the self and others. You are always conscious and aware.

Remaining in the light - you are responsible for your thoughts.

Remaining in the light - there is no physical biology to maintain.

Quantum particles are always in motion and therefore make sound, each has a particular resonance. Quanta think, evolve, are self-directed and know what each other know. Your consciousness and signature frequency has sound, a resonance and a wide variety of frequencies and vibrations. Quanta work cooperatively together and can transfer information from one end of the universe to the other end, in "subspace," at least 10,000 times faster than light. Without being diminished.

Form a question and there is an answer, even multiple answers. Predictions are not magic or fortune telling in the field, when you read the field. There is no "known" future; there are strong potentials or probabilities when you know what is already happening in the quantum field.

The "dark bandwidth" is NOT part of the quantum field, because the quanta spin has slowed so much, it gathered matter, solidified and is no longer compassionate. Its resonance and life force is WEAK.

Quantum laws of **ATTRACTION, ALLOWING and ENTRAINMENT** work together all of the time, they support and reinforce any feedback loop you exist in and help maintain with your thoughts. When you are confused and in denial you can easily continue a dark cycle. When what comes out of your mouth is not backed up with what you think and feel, YOU create confusion and stagnation for YOU ALONE. The invisible realm or quantum field, your soul conglomerate and other light ones, read the truth in your aura, DNA or energy field. You are the only one that just might not understand YOUR denials or self-deceptions.

The dark power structure that was in control of earth creating and supporting dark agendas is no longer functioning as a united organized front. BUT there are still many small pockets of darkness and individuals that are "melting down," acting out, clinging to their biology and still very dangerous to interact with. Avoid being their collateral damage; ANY engagement is entraining with them and lowering your resonance.

FIXING anyone or their issues to please you, is not allowing. Accept and allow that some family, friends, leaders and politicians that previously carried some light are choosing fear, confusion, signs and symptoms of mental illness. Centuries of corrupt systems are crumbling.

Always allow others their choices, BUT when they cross boundaries or borders you and others have to stand in your truth and keep your

electromagnetic field closed to the dark. Be firm, expose lies and distortions and use nonviolence to protest.

The law of attraction pulls thoughts with similar vibrations and resonance together. The quantum law of entrainment holds "like thoughts" together. An energy field dark or light REINFORCES your energy patterns or thoughts creating a feedback loop that your thoughts or your state of consciousness exists in until you ACTIVELY, consciously choose to change your thoughts and their resonance.

When you have released your pockets of density, your energy and consciousness are free flowing and aligned with compassion. Your carbon based biology has been moving into a crystalline state, beyond all the carbon based issues and handicaps the Dark Ones are continuously challenging the biology with.

Quantum law of **PERCEPTION** is, in order to PERCEIVE a thought, resonance, vibration or reality you must MATCH its resonance with your resonance.

The ENTIRE range of electromagnetic radiation or light, or quantum particles can only be seen or perceived when you are in a state of compassion. Darkness is the absence of compassion UN-consciousness, and ignorance.

You are NOT anyone's keeper or responsible for anyone's choices or satisfying their neediness. You do not exist to serve or worship anyone or anything. There is no way to do for another, what they need to do for the self.

Praying for peace is GIFTING, "I mean forcing," your agenda on those that may not want peace. Can you stop gifting people with things and feelings YOU want to give and they may not want and haven't asked for?

Quantum principle of **ENTHUSIASM** is that new thoughts generate enthusiasm. New thoughts are ALWAYS showing up to challenge old beliefs and perceptions. New thoughts or information mostly come from within you BUT can come from most anyplace. The law of attraction provides you with vibrational matches.

Quantum principle of **PERPETUAL TRANSMUTATION** of resonance or consciousness, says all sentient beings can change their resonance or state of consciousness continuously.

Those that are awake and aware know, how third dimensional daily life can be influenced by their fourth dimension artistic moments, creations, dreams or during sleep. When the human soul essence allows the self to remain in continuous contact with its soul conglomerate or aspects of itself in the light it calms the fears and worries humans have existing with the lower frequency energy fields of the Dark Ones. Keep expanding your knowledge, guidance and support from your higher stream of consciousness. Your soul can help you start thinking and feeling compassionately again. You can choose to stop crippling a "significant other" by keeping them tethered and dependent on their relationship with you. Allow both of you to stop sacrificing, servicing, compromising or competing in order to maintain a relationship with each other. You claiming

compassion for you will allow others to do the same. You will also be an example of "HOW TO" be responsible for the self.

LAW of ATTRACTION

Quantum law of **ATTRACTION** electromagnetically pulls together "like resonances" or similar thoughts and vibrations together. You get what you emanate. What comes to you **CLEARLY** reflects your thinking.

You can't change or heal what you are **NOT** consciously aware of. The one(s) and information you attract to you, reflect your **BELIEFS** about who and what you are. Self-pity, fear, worry, self-sacrifice, feeling victimized or wounded brings **YOU** more of the same energy field to enjoy.

When your perception is that others do not "allow you," you are most likely, not allowing them also, in some different creative way. Take the time to consider whom you are not allowing and consequently causing them to cater to your neediness or pathology.

Before trying to confront, comfort, heal or **FIX** what you consider an "issue" in **YOU**, him, her or it, your companion pet or child, notice **YOUR** thought patterns first. Punishment and blame **NEVER** alter behavior, but will put your **SOUL** essence's resonance in the low vibration of the one you punish or blame.

Where your attention is, there **YOU** are.

Quantum principle of **COMPENSATION** and the law of attraction both say that we receive "like energy" to the energy we emanate and share. We attract and are attracted to realities, people, diseases, difficulties, animals, planets and activities that vibrate to our current signature frequency.

Quantum principle of **PROSPERITY** is that you prosper in direct proportion to your ability to receive and enjoy being prosperous. Prosperity is **DENIED** to you in direct proportion to you feeling guilty, not worthy, hostile or envious for witnessing another's prosperity or your own prosperity.

Maintaining a prosperous compassionate attitude even in states of poverty or what you consider lack, is what moves you into prosperity and triggers the law of attraction to bring you more of what you have created already.

Quantum principle of **UNCONSCIOUS MIND or BRAIN** is that it is **ONLY** used for this lifetime and this biology. It is unable to distinguish **FACT** from **FICTION** or truth from deception or a "setup" because it is unconscious.

Only being conscious and aware enables you to decide, choose and change your thoughts and perceptions. Resonances of fifth dimensional experiences are too high and rapid for a third dimensional brain's neural patterns to capture, file, and maintain. The mind in your aura has those experiences when you move into higher brainwave states to remember them. Start by deeply relaxing, feel your shoulders drop naturally, allowing your head to rest and heart or compassion to be your point of perception.

Quantum principle of **REALITY or ACTUALITY** is that any measurable things like an idea; object, event or entity that can be seen, heard or felt becomes an object having **REALITY** or mass. **BUT** does not need to exist in material form, to be considered real.

The human consciousness is the creator, programmer and the one experiencing the reality we continuously create with our thoughts consciously or unconsciously. What you do NOT want to see or own is still present, BUT you may not be looking for it, so you don't SEE it. Therefore, you do not find it. You choose the reality that you want to see, perceive and exist in. **SEEING** is about what you choose to perceive in a quantum field that includes ALL THERE IS.

Quantum principle of **EXPANSION or INCLUSION** is never ends as long as there is more to be included in the definition or description. We are all that THERE IS and all that can be. To exclude limits you and your options.

Expansion can also mean resurrection or ascension.

A compassionate person is seen and felt as safe, they are balanced they're not going to hurt or compete with you, be unkind or insensitive. Compassion listens to you, because it sees beyond judgment, blame, punishment and differences.

Quantum principle of **CAUSE and EFFECT or RECIPROCAL ACTION** is nothing happens by chance or outside of quantum rules and regulations. The fact that you cannot identify a cause or effect is IRRELEVANT. For every action there is a reaction or consequence someplace.

RECIPROCAL means given, felt, or done in return. Binding two parties equally to an agreement or obligation, mutual action or relationship. BUT in the dark bandwidth "the effect" may take so long to happen, you might not live long enough to see it happen in one lifetime. "Cause and effect" and karmic rebalancing of energy happens immediately in the light bandwidth.

KARMIC ENERGY is only found in the lower vibrations of UNBALANCED energy, the dark bandwidth of cause and effect, trying to rebalance itself. Those incarnated on earth for the first time, do not have karma because the new souls are from the light bandwidth and are IN SYNC with their soul conglomerate.

FEELING ENTITLED to wound others intentionally or desiring to WOUND another because YOU DECIDED to feel wounded, ignored or not appreciated by them. Hold you in dark unconsciousness. Enabling others or allowing others to service and please you will maintain your feedback loop of violating each other's freewill and not allowing.

Quantum principle of **HAPPINESS** is the way you feel about WHO you are, what you do, and what you have manifested, creates your happiness for you. Not your title or the role you play, what you own or whom you control with guilt and blame or what human law you follow.

Quantum principle of **GRACE** would indicate there was judgment in the light bandwidth and there isn't. Quanta just ARE. You create your own grace with your compassionate point of perception and thought patterns.

You are your creator and the giver of grace for you!

In higher brainwave states, injuries and wounds you have sustained or caused can be healed or released from within you. Lies you have followed, mistakes you have made and hardships you have endured. YOU can decide that feedback loop is completed and release the emotion they carried for you.

Dr. Bruce H. Lipton, PhD discovered, our DNA scans our environment for frequencies that match our beliefs. This is the Law of Attraction in operation. Then our DNA changes its structure to match what we choose to perceive and resonate with.

Quantum law of **VIBRATION / RESONANCE** is predictable and can be measured, calculated and understood. Each resonance has a unique color, sound and smell. Each resonance has event sites with themes or purposes. You interact in real time with any resonance your thought patterns can match.

All mantras, rituals, prayer, affirmations, ceremonies, traditions are MINDLESS, unconsciousness or dissociation that always has an AGENDA of NOT allowing someone or something. Words and phrases used in a singsong manner produce changes in your resonance chemically, emotionally and perceptually. Singsong chanting shuts down your consciousness putting you into pastime, obedience and a state of begging.

Our handlers gave humanity, THE memories, lies, rituals, and traditions that trapped them into their dark resonance and desire to control humanity the way they were controlled and many continue to be controlled.

You frequently can't observe the feedback loop of victim predator in one short lifetime because the biology is only viable for a short time. While the soul essence that is connected to your stream of consciousness is eternal.

Quantum law of **BALANCE** is that it maintains order, peace and harmony in the quantum field.

Incomplete or partial thoughts, misdirection and lies by Dark Ones create rather loud static that leads to chaos, doubt and worry in humanities thought process. Static blocks the clear channel Light One's are emanating making compassionate truths unclear, unintelligible or purposely distorted and unbalanced. BUT inside, especially the smallest child, knows when they are not being compassionate.

Quantum law of **PROJECTION or EMANATION** is that your point of perception is the reality or personal STORY you hold to be your truth. YOUR thoughts, emanating from you, manifest in your external reality for you to SEE with clarity what your thoughts are and how they feel.

Your creations are meant for YOUR electromagnetic energy field. As soon as you cross into another's energy field to assist them in doing it YOUR WAY you are manipulating or forcing your agenda. Fairness or the "right way" is not a concept in the fifth dimension and higher brainwave states, because if you do not plan on assigning blame, penalties or punishment what does it matter if it is fair and there is NO "right way."

Quantum law of **FLUIDITY** says life is best when experienced as a fluid substance and not as a rigid solid. Life, the quantum field, has no fixed shape; it yields easily to external pressure. The way water runs, no faster or slower than is called for and seeks its own level. Its flow is even, unforced and fluid, staying in the now moment without hurry or standing still.

When you experience resistance and frustration you have moved out of the flow. Take time to consider how to redirect yourself back into the flow.

Quantum law of **ENTRAINMENT** requires two or more frequencies, resonances, realities or thoughts existing in the same space **MUST** combine to create a **SINGLE** resonance. That applies to all sentient beings, humans, planets and universes.

Law of Entrainment is falling into sync with the resonate frequency you attract and have entrained with. The frequencies blend to form **ONE** resonance. One resonance becomes a self-perpetuating feedback loop. This is how humans create their own individual reality and feedback loop of thoughts. This is a how "like minded" group; families, tribes, countries or planets get formed.

Quantum principle of **RECONCILIATION** is seeking what is common and similar to you and all others allow different qualities to get unified into similarities to diminish differences, which decreases conflict.

Polarities, opposites move into the center point of balance. Examples of combining two or more to make a single resonance: on a scale of 1 to 10. If you are at 2 and the other is at 8 you will vibrate at 5 together. Unless one vibration is overpowering then it will pull the other to their level. That way both would be at 2 or 8 or possibly 3 or 7.

Another mathematical example to explain entrainment is to use a number line with zero at the center and positive numbers on one side and negative numbers on the other side of the number line. A darkness of -3 would need at least a $+3$ to neutralize the darkness or to **REMINDE** the dark it comes from the light. It will take more than $+3$ to increase the resonance to $+4$ or $+5$.

As long as **YOU WANT** something, **ANYTHING** from another you **ARE ENGAGED**, entrained with them in a low resonance, maintaining a victim predator feedback loop. A feedback loop of what you want **AND** their resistance to your neediness. "Your prey" senses your energy field. Even if one of you has the illusion of "a win," what have you won? You are the only one having the authority to **DECIDE** that this feedback loop is complete and over for you. Disengaging mentally, psychically, physically and emotionally ends that feedback loop or cycle.

There are 5,000 Earth-like planets in this Galaxy, and all of them are at various stages of evolving into compassion to reunite with the quantum field. They are all supporting each other to increase their states of consciousness or resonance. At the bottom of consciousness in the family of planets, is Gaia, who allowed humanity and the planet, to experiment with the polarities of light and dark. Dark Ones got extremely unconscious, insensitive and cruel.

Those still choosing to avoid compassionate thought patters, are entrained, "bar coded" and ready to join another lower fourth dimension reality. "Back in the day," Dark Ones or the Lost Ones, came to Gaia when their home planet evolved into the quantum field of light and their low frequency or resonance, dropped they out. When Dark Ones display what might pass for sensitivity, it is generally a "con," or a "setup," there is an agenda, hidden or not so hidden. They seek power or control or a desire to force others because they hold the illusion that they are "greater than" or "better than" or "smarter than" another or others.

Quantum principle of **HARMONY and AGREEMENT** says efforts to manipulate, trick, coerce, compromise or force harmony and agreement is an agenda that disrupts areas of harmony already established.

When children or people are getting along well, allow that without your neediness for attention, conflict or chaos disrupt them.

CONFLICTS and deep listening, do clarify AGENDAS.

CONFLICTS are designed to eventually manifest harmony. Between hostile enemies there is always some small area of agreement that can be increased.

Fifth dimension and beyond is a culture of compassionate equals.

Quantum law of **AUTHORITY** says the one aware, worthy and capable of accepting responsibility for an act has the authority to act.

That would be YOU acting or not acting on your behalf. You are the only one having the authority to change YOUR perceptions and your state of consciousness. Your perception is your reality and how you respond to what you tell yourself is true.

Quantum principle of **LIABILITY** says YOU are responsible and answerable for your use, abuse or neglect of the rights you have and the rights you have earned. You are always responsible for the thoughts you hold and the resonance they carry.

Receiving what you enjoy or fail to enjoy is NEVER LUCK, it is your ignorance of all the other factors in play. Notice if your state of consciousness attracted a gift or blessing, an option to reconsider or something neutral that does not really concern you? Have you attracted one last test, to test your resolve about a new perception? It is not what happens, it is what you choose to THINK and do, about what happens that is significant.

Quantum law of **RESPONSIBILITY** is that you respond to a need, WHEN you have the ability and wisdom to respond to that need without having an agenda.

Without energy feeding cords or dark contracts or agreements of sacrifice, incurring debt or compromising your physical health. Only without an agenda do all members receive energy, because you are synergistically creating more wisdom and compassion together.

Engagement with dark energy fields or Dark Ones in anyway always creates competition. In order to compete you OPEN your electromagnetic field or aura into a dark energy field. Where energy gets siphoned, exchanged and entrained. When you get wounded ONCE again, you become the "drama queen" claim foul, and choose to believe you have been victimized. You are in denial about YOUR CHOICE to enter a competition.

Standing in your truth is not a competition, if you don't make it one.

As long as YOU WANT what you think you are OWED, like vengeance, punishment, getting even, out smarting, watching them suffer, getting their "love" acceptance or money, proving them wrong or right, blaming or judging them YOUR electromagnetic grid or aura surrounding your body will be OPEN for them and other darkness to siphon your energy and share their darkness.

YOU VIOLATE the rights of others when you are NICE to them and EXPECT them to be nice to you. They owe you nothing! Your resistance to "allowing" creates friction, upset and frustration for you alone. Self-sacrifice IS, not allowing, you are NOT anyone's keeper or responsible for anyone's choices. You do not exist to serve or worship anyone or anything. There is no way to do for another, what they need to do for the self.

Quantum law of **PENETRATION** or deep listening or mindfulness says that anything that is seen with great quality of attention and knowing creates compassion.

Secrets and withholds are only found in the dark bandwidth or resonance. When you take the time to solicit the thought process, YOU and others have, you create awareness and compassion. The very act of penetration or deep listening or mindfulness OPENS UP your electromagnetic energy field to receive and give each other the resonance of your consciousness. That creates a synergy between you. Engaging this way CHANGES both of your energy signatures, during the time you are engaged with each other.

Dark Ones opening up their electromagnetic energy field to each OTHER result in using each other and energy feeding, they share their lies, pretty stories, disinformation, denial and abuses. Dark on dark LACKS sensation, SINCERITY and penetrates NOTHING all avoid moral culpability. They experience the mechanics of an interaction without sensing or feeling it. The only investment is what they can TAKE from each other. That is how the dissociated and addicted UN-consciousness exists. They are endlessly handled and triggered to complete habitual acts that serve their current internal or external handlers and predators.

Spouses and children of "enforcers" abusers and predators frequently protect and enable their abuser. Both reside in the low resonance of self hate and codependency. The victimizer believes that no one could REALLY care about them unless they were forced to have contact with them. The victim believes they don't deserve anything better or more compassionate because they think they are worthless and need judging, blaming and punishment. Dark Ones withhold compassion from the self and others.

When you can't perceive the darkness in some of your thought patterns. YOU cannot perceive the darkness and illusions in other's thoughts and resonance.

Quantum principle of **SECURITY** is that you can express in a manner that allows your best performance without infringing on the expression of any other's expressing their best performance.

Quantum principle of **PRIVACY** means every person is entitled to the right of privacy and others can't infringe, read minds or question their motives without their consent.

In the light bandwidth or quantum field there are no secrets, you can know the answer to any question you can form. The quanta principle of PRIVACY is WHY the invisible realm needs to be INVITED into your space and spoken to "out loud." Out loud means you have given consent for another to know your thoughts. This is why you need to give a SHOUT OUT to anyone's soul essence you want to commune with that has a biology or not. Use their name or job

description. Speaking aloud makes what you say, concrete or manifested in this physical reality.

YOUR POVERTY

Your DEBT and your DEMANDING mean, you have chosen NOT to do it for yourself.

Quantum law of **POVERTY** is, to the degree you WITHHOLD YOUR energy and resources to be compassionate and responsible for the self, YOU create poverty for you and anyone dependent on you. When you unfairly claim the energies and resources of others and squander them, you unbalance all of you. Your lack of ethical behavior, demanding and debt create a stressful, negative feedback loop.

Another CANNOT create FOR you what you need or want.

Your poverty manifests itself, when you are productive and FAIL to take your proper reward, energy or money in a suitable manner. Because you believe YOU are unworthy or you are "fake humble" or "pretend pious" or incapable of owning what you created.

SQUANDERING is wasting something like your energy in a reckless or foolish manner. Squandering is allowing an opportunity to pass you by. When someone ALLOWS you to squander what they create, they reside in the same resonance of poverty you are in. Financial, physical, emotional or energetic debt or demanding reflects with CLARITY how you feel and THINK about you. YOUR debt makes other's CARRY you, while both of you play a fake game of caring and control of each other. Are you spending more than you earn, to create an illusion of self worth?

MONEY was artificially created by our handlers as a symbol or metaphor for ENERGY: that is stored, borrowed, earned, spent, owed, claimed or exchanged and does not exist in higher states of consciousness because there is no need to force or control each other, because all are equal and all basic needs are met.

Quantum law of **CORRESPONDENCE** is "As above, so below" and as within, so without. The quantum field and its laws of physics are everywhere, but act differently when quanta spin slows, collects matter and solidifies.

"Correspondences" are similar or equivalent BUT not exactly the same. The instant a thing becomes physical all manner of "limits" exist and are put upon it. The biology is only a very limited and primitive container. Compared to the soul essence that is human consciousness, filmy, flexible, eternal, and can go anywhere it believes it can and know anything it forms a question about.

Quantum law of **MACROCOSM and MICROCOSM** is the first law of infinity. The same patterns (fractals) are reproduced in all levels of the universe from the largest to the smallest. The whole is equal, more or less to the sum of its parts depending on the ordering of those parts. In everything that exists there is within it some part of the whole.

MICROCOSM is a miniature of something larger.

MACROCOSM is the whole of an entire complex structure made up of MANY quantum particles. Universes expand until all the different realities intersect. As it reaches that point it continues in the same motion eventually collapsing in on itself. Reaching zero point energy or a resting state it starts to expand again.

Quantum superposition says that ALL possible states of an object or consciousness are possible simultaneously UNTIL, you focus on ONE and then you create a single possibility in that moment. Every quantum state can be represented as a sum of two or more other distinct states. A quantum can be in two places or more at once.

This universe is a 21 trillion year old holograph made up of the collective consciousness of all within it. Dark Ones, dark thought patterns / consciousness are quarantined because they stagnate and become mean spirited. Anything with a higher resonance than itself is not perceived, sensed or seen.

The outermost circles are the highest vibrating and encompass the lower vibrations or dimensions, illusions or realities. Planets, universes, people and portals are sentient beings that choose to experience living in the form they adopt in present time.

Quantum principle of **PARADOX** recognizes the MOVEMENT of four principles or laws of energy simultaneously: Causes and Effect, Microcosm and Macrocosm, Vibration and Inertia. The four have a certain momentum of equal and opposite reaction all coming together in a COLLISION at a certain point in their cycles.

A paradox is two swirling portals or frequency trails, merging partially or overlapping each other to create a new reality or truth or thing, in the area of overlap. In the light bandwidth there is Over-Lighting or Shadowing or Mind Melding when auras are overlapped. This is done to share ideas, wisdom and offer new patterns of thought by the process of inductance. NOT by being an enabler or handler or predator.

In quantum superposition, simultaneous energy waves spread-out, sampling all possible routes or hook-ups. Then quanta or your soul conglomerate or you consciousness focus on one with the highest probability of happening.

On a FLAT two-dimensional plane it is like a stone dropped in a stream with the ripples moving out. In a CUBE of space, movement occurs in all directions simultaneously at a certain vibratory rate. Like the ringing of a bell creating vibrations in all directions. Paradox touches high levels of vibration (light) and dense levels (dark) of vibration simultaneously making the entire area appear to be alive. What is said about one level holds true or is UNTRUE for all the levels.

Computer code is an example of a FLAT two-dimensional plane, it has zero OR one, it is sequential like everything in the third and many times fourth dimension matrix. That is why we have physicality, opposites, and sequencing of time, past, present and future. The dark bandwidth is a flat plane.

Quantum computing has zero AND one at the same time. In quantum computing a QUANTUM BIT is a unit of quantum information that considers all possible solutions or answers to a question or problem SIMULTANEOUSLY and

NOT sequentially, it is a cubed space. It pulls the particles it needs to manifest the consciousness of a person, event or thing as you think about it, all at once.
